DETAILED ACTION

This office is in response to remarks and amendments filed on June 11, 2009.

Claims 1-6 are pending.

Allowable Subject Matter

Claims 1-6 are allowed over prior arts.

The above mentioned claims are allowable over prior arts because the CPA (Cited Prior Art) of record fails to teach or render obvious the claimed limitations in combination with the specific added limitations, as recited in independent claims and subsequent dependent claims.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method and system for providing an electronic device, a control method and a security program capable of preventing or suppressing the theft of the electronic device. Independent claims 1, 5, and 6 uniquely identify a distinct feature of controlling an electronic device comprising:

a mounting device which loads a portable recording medium; and an encrypted information write device which writes encrypted information obtained by encrypting predetermined information using an electronic device unique key unique to the electronic device, and an electronic device unique key encrypted using a recording medium; unique key unique to the recording medium, in the recording medium; the method comprising the processes of:

authenticating medium identification information for identifying the recording medium, and device identification information for identifying the electronic device, in the case where the recording medium is mounted on the mounting device; generating a common encryption key for encrypting or decrypting the electronic device unique key in accordance with the authentication result; reading the encrypted information recorded in the recording medium, and the encrypted electronic device unique key; forwarding the read electronic device unique key to a control portion for the recording medium, and acquiring the electronic device unique key encrypted by the common encryption key from the control portion, after the electronic device unique key is decrypted by the recording medium unique key in the control portion; decrypting the acquired electronic device unique key by the common encryption key, and executing the decryption of the encrypted information using the decrypted electronic device unique key; and setting the electronic device in usable mode in the case where the encrypted information.

Applicant argument filed June 11, 2009, and December 31, 2008 found persuasive, and an updated search did not reveal any prior art that would anticipate or make obvious the currently claimed invention. . Claims 2-4 are allowed due to their dependency on independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
